GENIEMAT® RST

Underlayment for Reduced Sound Transmission

GENIEMAT[®] RST

Sound Control Underlayment

FROM THE INVENTOR OF THE PATENTED TECHNOLOGY (US 6920723, US RE41945, CA 2398262) FOR RECYCLED RUBBER USED FOR IMPACT SOUND INSULATION, DIRECTLY BELOW FLOOR COVERINGS.

GenieMat RST is a flat, resilient, reduced sound transmission mat made from 94% recycled rubber content, used directly under hard surface floor finishes and over concrete and wood construction.

It is used when superior sound control is required in multi-family housing, high-rises, or commercial buildings and protects ceramic tile, porcelain and stone from substrate cracks.

Engineered for direct adhered floor coverings such as tile, stone, wood, and vinyl floor coverings.

Tile – All products rated for minimum of commercial use.

Wood – **GenieMat FAS** adhesives offer superior bonding strength.

Vinyl – One-step method provides superior sound control for resilient floor coverings.

Features and Benefits:

- Mold, bacteria, fungi, and water resistant
- Exceeds pass criteria for point load test for crack isolation membrane (ANSI 118.12)
- Meets requirements for VOC emissions (IAQ test, ASTM D5116)
- Qualifies for LEED[®] points
- Floorscore[®] certified
- Complete floor covering system warranty available

GENIEMat RST PRO

Waterproofing and Impact Sound Control System.

GenieMat RST PRO is a waterproofing and impact sound control system designed to provide both moisture protection and acoustic performance in flooring installations. It serves a dual purpose by acting as a barrier against water infiltration while also reducing impact noise transmission, making it an ideal choice for areas where both sound control and waterproofing are essential.

This system is typically used in multi-family housing, hotels, and commercial spaces where sound privacy and moisture resistance are critical. It can be installed under various types of flooring, including tile, hardwood, and laminate, ensuring durability and effective sound insulation.

Features and Benefits

- Waterproof membrane generally applied to the concrete floor to save time, labour and material.
- The highest IIC performance ratings for tile installations.
- Fully waterproof per ANSI 118.10.
- Protect wood flooring from excess moisture vapor in new construction.
- High tensile strength for crack isolation.
- Qualifies for LEED® points.
- Floorscore® certified.
- Complete floor covering system warranty available.
- Mold, bacteria, fungi, and water resistant.
