PRODUCT NAME: **GenieClip WATT**

DESCRIPTION: **GenieClip WATT** is a vibration isolation HVAC linkage that incorporates a non-linear design made from an elastomeric spring in a steel housing. The hangers are shipped fully assembled and ready for installation in threaded rod suspension systems.

APPLICATION: Used to isolate suspended sources of vibration. They are commonly used to suspend mechanical system components such as fans, piping and equipment. Other sources include speakers, garage door openers, conveyors or other processing equipment.

FEATURES AND BENEFITS:

- Wide operating load range enables simplification of isolator selection
- Substantially reduces noise and vibration for any equipment
- Easily fastens to standard threaded rod with no specialist tools required
- Dynamic stiffness allows for low natural frequency at low loads
- Achieve > 1" (25.4 mm) deflection
- Packaged ready to use with no preloading spacers needed
